

# Stabiliser Assembly

The Wellpro Group Stabiliser is designed to be part of the bottom hole assembly in order to provide centralisation of tools during operations.

The Sleeved Stabiliser has a main mandrel that allows for interchangeable sleeves to be attached. The tool also allows the BHA to rotate whilst being supported by the external flutes, thus eliminating possible wear.

The Fixed Blade Stabiliser is of one piece construction and ideally suited for all milling and workover applications.

## Specifications and features

- Sleeved Stabiliser body can accommodate a range of stabiliser sleeve diameters
- Fixed Blade Stabiliser manufactured in solid one piece for strength and durability
- Full through bore for drop ball passage

Tool Size (In)	1.688	2.125	2.875
End Connection	1" AMMT	1 - 1/2" AMMT	2 - 3/8" PAC
SS Tensile Strength (lbs)	42,000	62,305	184,500
FB Tensile Strength (lbs)	57,217	70,650	239,100
ID (in)	0.50	1.00	1.38
Length (ft)	1.42	2.08	1.83
Working Pressure (psi)	10,000	10,000	10,000
